## COMPUTER SCIENCE & AI SPECIALIST

I am a motivated and results-driven Computer Science graduate with a strong foundation in Python, machine learning, and data analysis. Known for driving efficiency, delivering successful outcomes, and collaborating effectively within cross-functional teams, I bring a proactive approach to solving complex problems and contributing to impactful projects.

---

## KEY COMPETENCIES

Python	SQL	C#	Strong interpersonal skills
HTML	React	GitHub	Proactive and self-motivated
JavaScript	Machine Learning	Power BI	Exceptional organizational skills

---

## PROFESSIONAL EXPERIENCE & EDUCATIONS

### EDUCATION

Graduated with First-Class Honours in BSc Computer Science from York St John University (equivalent to a 4.0 GPA in the US). Gained strong experience in Python, machine learning, and data analysis through practical coursework and research projects. Proven ability to solve problems, think critically, and collaborate in team environments.

### WORK EXPERIENCE

#### i2i Football Academy

November 2022 - 2025

##### Youth Soccer Coach

Alongside my role as a player in the i2i International Academy, I was selected as one of only two players entrusted with coaching youth teams due to my accountability, reliability, and strong interpersonal skills. In this role, I planned and delivered engaging training sessions, supported player development, and communicated effectively with both parents and coaching staff. My ability to lead by example and build positive relationships made me a trusted figure within the academy's coaching environment.

#### The Soccer Box Dallas

August 2020 - 2024

##### Youth Soccer Coach

Developed skills such as good communication, patience, and problem-solving among many others. This job has taught me about the importance of customer service, as dealing with parents who always want the best for their kids, you must be able to provide the parents with the comfort (customer service) of knowing their kids are in good hands as well as the advice necessary to continue on the best path.

## PROJECTS

#### Football Data Scraping - <https://github.com/gavinwhite03/Football-Data-Scraping>

This project involves scraping football (soccer) data from a popular sports statistics website using Python, primarily leveraging the BeautifulSoup library for web scraping and Pandas for data manipulation and analysis. The goal is to collect comprehensive match statistics for multiple seasons of a football league, focusing on metrics related to passing, shooting, defense, and goal creation.

#### Library Management System - <https://github.com/gavinwhite03/Library-Inventory-Management-System->

This Library Inventory Management System is a web-based application built using HTML, PHP, CSS, and SQL. It provides a platform for managing the library's book inventory efficiently. The system allows customers to check out books and enables managers to perform various CRUD (Create, Read, Update, Delete) operations on the database, along with searching for books directly from the website.

#### Personal Portfolio Website - <https://github.com/gavinwhite03/react-portfolio>

This project involved the creation of a website using React, HTML, CSS, and JavaScript to develop my Web Development skills and create an organized and fun way for possible employers to view my work.
